

LAUNDRY SANITISER

SPECIALIST LAUNDRY ADDITIVE

- Kills all types of bacteria including MRSA
- Effective against bacteria at ambient temperature
- Super-concentrated for low cost in use

USES

LAUNDRY SANITISER is a specialist additive to control bacteria within the laundry washing process. The product is designed to offer high levels of bactericidal action to reduce the risks of cross infection from laundered fabrics.

A clear, pale yellow liquid, LAUNDRY SANITISER is based on a stabilised hypochlorite which can affect some fabrics.

LAUNDRY SANITISER is designed for use through the ULTRA MARSAN dosage system where it is accurately dosed into the final rinse at a level of 150ppm available chlorine (Department of Health recommendation).

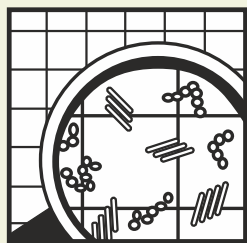

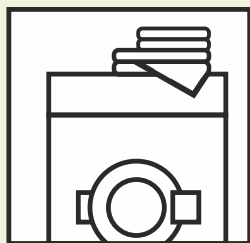

Ideal for use in establishments which launder infected fabrics, e.g. care homes or hospitals.

DIRECTIONS

Only use via the ULTRA MARSAN system at the pre set dosage levels provided by Christeyns. **DO NOT** increase the levels of LAUNDRY SANITISER per wash above these preset figures.

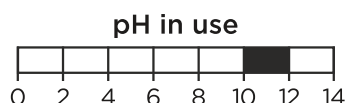

DO NOT use on woolens, silk or fabrics with the  symbol.

ULTRA MARSAN dispensing system must only be fitted by approved engineers of Christeyns. **NOT** suitable for use by hand.

Use biocides safely. Always read the label and product information before use.
