

D327

POWERFUL HIGH FOAM CLEANER

- Economical - a little goes a long way
- Powerful - strong action
- High foaming - clings to surfaces for effective action

D327 cleans and eliminates odours in one operation and is specifically designed for use through a pressure washer or lance with a foaming attachment.

USES

A hypochlorite based, highly alkaline food plant cleaner that produces a dense clinging white foam in application.

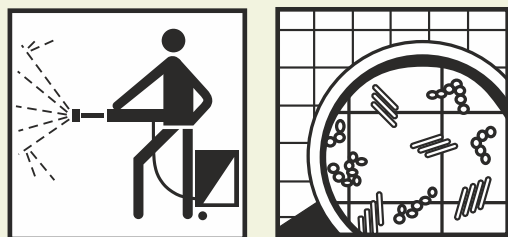

Ideal to remove carbonised deposits, dried grease and oil, blood, protein, and starch from plastic walls and ceilings, ceramic tiles, vinyl and plastic coatings, and stainless steel machinery and equipment.

Ideal for use in food preparation, food handling and food storage areas.

DIRECTIONS

For optimum cleaning results, dilute 1 part D327 to 50 parts hot or cold water. D327 can diluted to a maximum strength of 1:20 depending on the type of foaming attachment.

Apply through a pressure washer or lance with foaming attachment. Allow approximately 10 minutes contact time. Rinse away thoroughly using hot or cold water through a pressure washer.

DILUTIONS

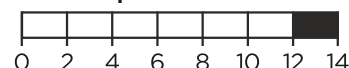

D327 : WATER

1 : 50

Code: 327

pH in use
