

Zi-GEST

ENZYME DRAIN MAINTAINER FOR KITCHENS AND THE FOOD PROCESSING INDUSTRY

- Treats grease traps, drains, gullies.
- Digests animal fats, vegetable oil, cooking grease, protein, starch and starch based thickeners.
- Biologically breaks down the causes of bad odours and blockages.

Zi-GEST is fragrance free leaving no possibility of tainting cream or oil based cookery ingredients. Zi-GEST is pH neutral and is safe for drains, septic tanks and cesspits.

Automatic – when used with our Christeyns *UltraFLOW* dispenser.

USES

Zi-GEST liquid concentrate contains a carefully researched selection of enzymes to maximise performance and digest oils, fats, grease and other organic matter blocking or impeding drainage systems or grease traps.

DIRECTIONS

Automatic dosing

Use an automatic dispensing system to dispense Zi-GEST each night into the drain system. This is the most efficient way of maintaining your waste system.

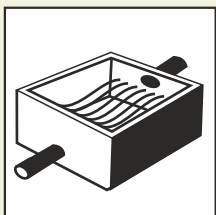

The Christeyns *UltraFLOW* dispenser is electronically operated with the ability to dose product automatically at a controlled amount each night. Zi-GEST is dispensed after the main liquid flow through the drain system is over. This maximises the time that Zi-GEST is in contact with the waste build-up from the days activities.

For standard establishments dose 150ml twice daily at optimum times (midnight and 4am).

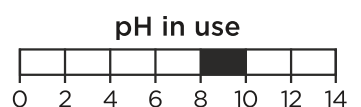

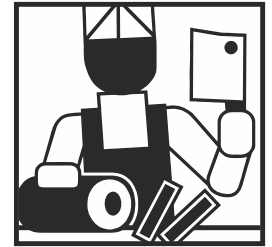

For very busy establishments (1000 meals plus) dose 240ml twice daily.

Manual dosing

Pour 150ml of Zi-GEST into a sink or drain followed by half a litre of warm or cold water. To treat the grease trap pour into the nearest point that feeds the grease trap.
