

PURITI LAUNDRY CARE

SOURS

ACIDIC RINSE ADDITIVE

- **Combats rust, iron and oxidation**
- **Effective against severe water hardness**
- **Decontaminates fabric from mineral deposits**

USES

A clear concentrated liquid acidic rinse additive.

Sours removes the effects of mineral and metal based stains, ie. greying and hardening of fabric or stains resulting from water hardness, water minerals and some medicinal or diet related stains.

DIRECTIONS

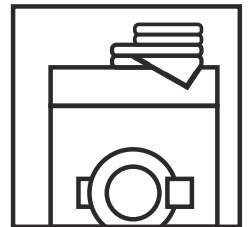

Method 1: Apply a solution of Sours to the fabric or immerse the fabric in a solution and allow to soak for at least three minutes before putting the fabric through the normal wash cycle with Puriti Detergent.

Use a 2% solution of Sours, or 100ml of Sours to 5 litres of water.

Method 2: Pour into the soap box during the pre-wash cycle of the washing machine. Then wash as normal with Clover laundry products. Use at a rate of 50ml per kilogram of dry weight of the fabric.

N.B. Do not use on nylon fabrics. Check for colour fastness of the fabric before use.
