

DETAK

CHEWING GUM REMOVER

- Fast acting and easy to use
- Powerful action - breaks down hardened gum
- Economical - low cost per application

A simple to use spot application treatment for the effective removal of chewing gum. Detak is a solvent based product.

USES

Designed to combat problems with sticky gum deposits by breaking down the structure of the chewing gum, allowing it to be removed quickly and easily.

Use to remove sticky gum deposits from solvent resistant carpets and fabrics.

DIRECTIONS

Apply directly onto the chewing gum, ensuring that both the gum and the surrounding solvent-resistant surface are thoroughly wet. Allow to soak for 5 minutes, then remove the softened gum with a scraper or other suitable tool.

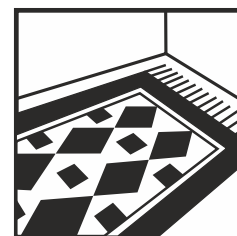

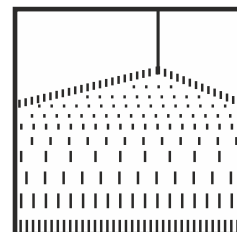

N.B. Always test surface compatibility prior to use.
