# PROTECT & PRESERVE

## ...OUR ENVIRONMENT

### ECO-RESPONSIBLE, IN ALL ITS APPROACHES

At Christeyns Professional Hygiene, we are committed to promoting a cleaner world. We prioritize our environmental responsibilities at every stage of our product's life cycle, from sourcing raw materials and the manufacturing process to packaging and delivery.

### SUSTAINABLE ALTERNATIVES

Our Research and Development department is dedicated to the use of environmentally friendly raw materials and sustainable formulations. We aim to strike a balance between quality, efficiency, and sustainability. As part of our commitment, we've successfully developed products free of phosphates, perborates, and NTA. Additionally, we've achieved important environmental certifications, including the EU Ecolabel and Nordic Swan.

At Christeyns Professional Hygiene, our strategic commitment to EU Ecolabel certification is underpinned by its exclusive accreditation under ISO 14024:2018. This ISO standard provides the framework for establishing Type I environmental labelling programs, with third-party assessments based on comprehensive criteria that assess a product's environmental impact throughout its lifecycle.

These criteria encompass the selection of product categories, environmental considerations, and functional attributes. They also include methodologies for evaluation and substantiation of compliance. ISO 14024:2018 further outlines the rigorous certification procedures required for attaining the prestigious EU Ecolabel.

Furthermore, our dedication to environmental responsibility is exemplified by the ISO 14001 accreditation of our production facilities. This certification serves as a testament to our commitment to sound environmental practices and management.

### LESS WASTE, MORE PROFITS. ALSO FOR YOU.

Our commitment reaches even further as it even covers your facilities. Christeyns helps you reduce your ecological footprint thanks to our premium dosing equipment and personalised advice and training.

Some call it ambition. We call it our duty.

## YOUR COMPLETE SOLUTION FOR ECOLOGICAL CLEANING AND AN IMPECCABLE RESULT

Committed to a global environmental approach and dedicated to offering environmentally friendly solutions for all your hygiene and disinfection needs, CHRISTEYNS presents:

### **The broadest professional ecological range**

- Very effective hygiene products at low doses
- Phosphate- and phthalate-free
- Neither toxic nor harmful to humans and the environment
- Reduced risk of allergies
- 100% recyclable packaging

### **FACILITATING INDUSTRY CERTIFICATION.**

Ecologically certified cleaning products can play a crucial role in helping organizations obtain their industry-specific certifications related to environmental standards. Different industries may pursue various environmental certifications to demonstrate their proactive stance on environmental issues to their customers. While the specific criteria and approaches for these certifications may vary, the use of eco-friendly cleaning products consistently forms a part of the certification process. The GREEN'R range can facilitate businesses in meeting these certification requirements, as it has already received independent environmental certification from a third-party organization.

## Kitchen Cleaning | Daily Cleaning

**GREEN'R DEGREASER 150°C****DEGREASER FOR HOT SURFACES,  
READY TO USE**

GREEN'R Degreaser 150°C is highly efficient in eliminating stubborn, carbonized grease from heated surfaces, making it possible to clean them while they are in use. It's splash-free, emits no harmful fumes, and residues can be effortlessly wiped away. This degreaser is designed for hot surfaces exceeding 150 degrees Celsius, such as planchas, ovens, deep fryers, frying pans, and grills, that are coated with cooked and charred fats. It comes ready to use.

8 x 1L  
Code: 341

EU Ecolabel:  
BE/020/011

**GREEN'R INDUS****ALKALINE DEGREASER FOR SURFACES  
AND FLOORS**

GREEN'R Indus is a powerful degreaser formulated to ensure highly effective cleaning of heavily soiled surfaces and floors in the food industry. This versatile product rapidly eliminates food oils, fats, blood, dirt, industrial oils, and grease.

It can be applied manually, with a trigger spray, a scrubber dryer, or a mop, offering flexibility. While being gentle on the environment, it surpasses even the most effective products available in the market.

Hard water

**GREEN'R AUTODISH S****AUTOMATIC DISHWASHER DETERGENT  
FOR SOFT AND HARD WATER**

GREEN'R Autodish S has been specifically formulated for automatic dishwashing in regions with soft to hard water hardness. It boasts effective alkalinity for dispersing and breaking down grease and food residues. This product delivers exceptional results by preventing the formation of unsightly white deposits on your dishes.

GREEN'R Autodish S guarantees efficient cleaning while maintaining cost-effectiveness. Not suitable for use on aluminium, brass, chrome, copper and other alkaline sensitive surfaces.

2 x 5L | 20L  
Code: 376

EU Ecolabel:  
BE/038/001

**GREEN'R RINSE GC****AUTOMATIC DISHWASHER RINSE AID  
FOR SOFT AND HARD WATER**

GREEN'R Rinse GC is ideal for use in professional-grade dishwashers and glass washers. It effectively removes detergent residues, facilitates rapid drying of dishes without leaving any streaks, and restores their natural shine. This formulation is specifically designed to be anti-foaming.
