Features and Benefits

Ultra
Dose

Simple training of cleaning staff is ensured by the colour coded labels and system board, allowing quick and easy identification of the products. The required dosage for each product is clearly indicated with numbers, eliminating any potential language problems.

Rationalise your product range by stocking just four products chosen from the range of nine versatile Ultra Dose cleaning chemicals. This can be enough to cover all cleaning needs in your establishment.

COSHH is built in to the Ultra Dose system, minimising time spent managing hazards and incidents. The controlled dosage method minimises the chance of any undiluted chemicals coming into contact with skin, helping to ensure safety to users.

Control spending on cleaning chemicals by following the economical dilution rates indicated on the system board. With this system, staff are less likely to use too much product, making supplies last longer. For most of the Ultra Dose products, a 2 litre bottle will dilute to make 100 trigger bottles of cleaning solution.

Control waste through the use of super-concentrated products. Compared to ready-to-use products, the amount of plastic waste produced per litre of cleaning solution is significantly reduced.

Reuse packaging to demonstrate your business' awareness of environmental policies. The trigger spray bottles and dosing pumps used with the Ultra Dose system are reused rather than disposed of.

Easy installation is guaranteed, as the Ultra Dose system is a compact unit that requires no plumbing. It can therefore be installed quickly and easily, even in areas with limited wall space. It also makes it the ideal system for any building where a mains water system is not possible due to insufficient water pressure.

The Ultra Dose System

Clover Chemicals' Ultra Dose system is a safe, economical and effective cleaning system that is suitable for any kind of establishment. It does not require connection to the mains water supply, making it the perfect solution for any establishment where there is insufficient water pressure for a plumbed-in dilution system.

When assembled, the compact Ultra Dose unit holds up to four 2L bottles, each fitted with a dosing pump which accurately dispenses 10ml of product per dose. The required dosage rates for optimum performance of each product are displayed clearly on a colour-coded backboard. The products are dosed accordingly into trigger spray bottles or buckets via dosing pumps, before being diluted with water from the tap.

The Ultra Dose system is available in two sizes to comprise either two or four 2L bottles. Simply choose your own combination of products from the Ultra Dose range of nine super-concentrates.

Components

	2 x 2L	4 x 2L
Colour-coded system board The customised board identifies the chosen Ultra Dose products and indicates their individual dosage rates for trigger bottles and buckets. The board is fixed securely to the wall by double-sided adhesive pads attached to the reverse side.		
Stainless steel wall bracket Chemical resistant and easy to screw into place, the wall bracket is available in two sizes, to fit either two or four bottles.		
Dosing pumps The durable pumps have a long reach neck to ensure easier and safer dosage into trigger bottles and buckets.	X 2	X 4
Labels for trigger bottles Ten labels are provided for each chosen product, to make trigger bottles of the diluted product easily identifiable.	2 X 10	4 X 10

Directions For Use

**Ultra
Dose**

1. Select either a pre-labelled trigger bottle or a 5 litre bucket, according to the task.

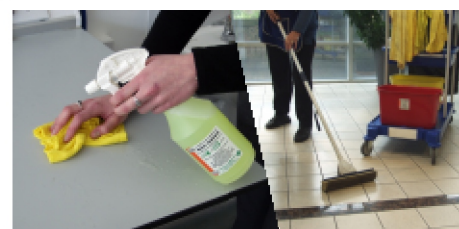

2. Locate the desired product from the system by matching up the stripe and product code.

3. Dispense the appropriate number of shots, as indicated on the board, into the bottle/bucket.

4. Fill the bottle/bucket up with cold water from the tap to produce the cleaning solution.

5. Apply the product as required. Once used, refill the bottle/bucket as before.

To avoid the lifting of buckets, the Ultra Dose unit can be installed low off the ground, so that the bucket can be left on a cleaning trolley:

Simply dispense the product straight into the bucket placed on the trolley...

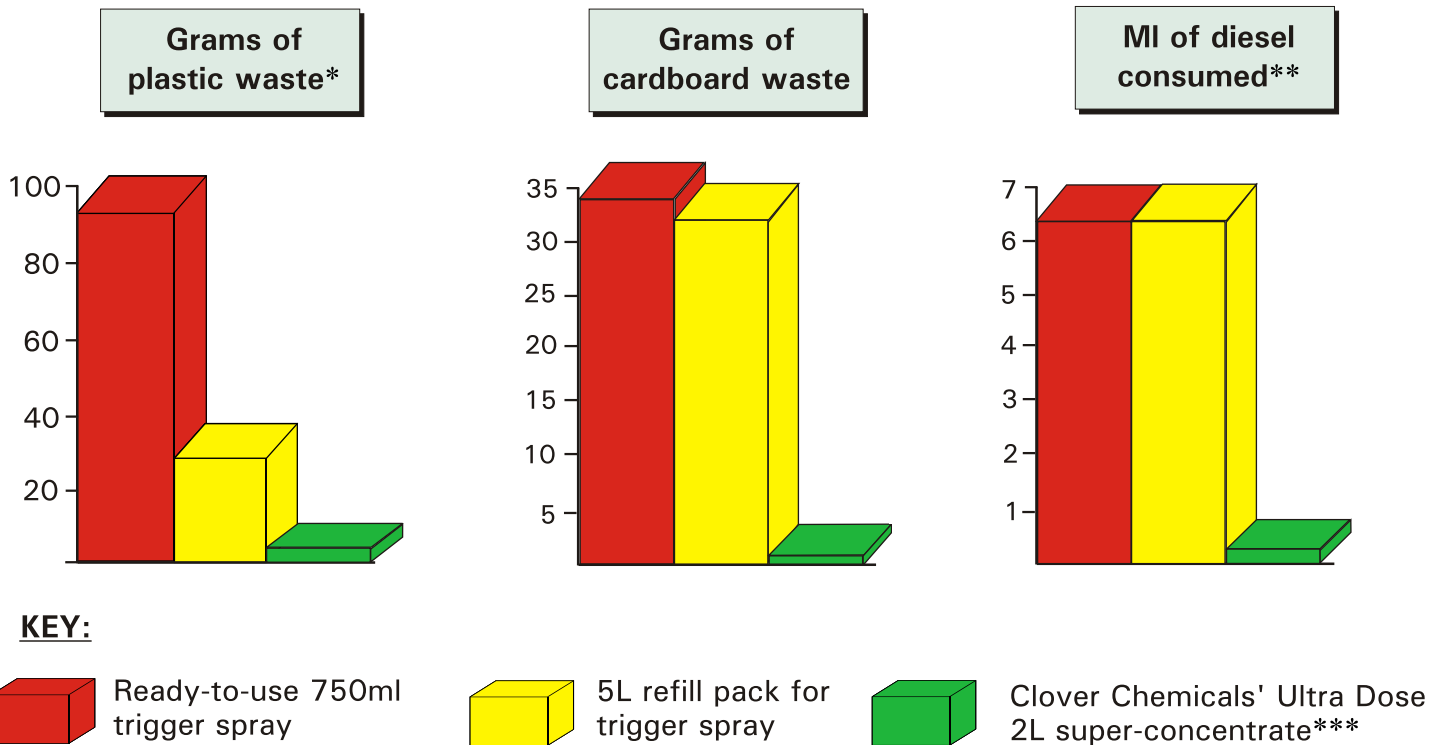

...and fill with water from the tap using a hose.

Dilution Guide for UB Concentrated Products (number of 10cc pumps)

	UB10	UB20	UB30	UB40	UB50	UB60	UB70	UB80	UB90
750ml Trigger Bottle	3	1	2	-	3	2	2	7	3
5 Litre Bucket	5	3	6	1	5	6	-	-	-

Comply with your company's environmental policies by choosing a cleaning system which has a lesser impact on the environment than using ready-to-use 750ml trigger sprays and 5L refill pack sizes.

The bar charts below show the amount of plastic, cardboard and diesel consumed for each litre of cleaning solution used:

* Based on a 600ml trigger spray bottle being replaced after 100 uses.

** Based on a delivery van doing 15 miles per gallon over an average delivery distance of 20 miles return.

*** Based on using a 600ml trigger spray of UB50 solution.

TRECOS Ecological Rating

TRECOS accreditation is based on ten rules Clover Chemicals believes are fundamental to the evaluation of the ecological and environmental impact of products in the cleaning industry. Products are awarded the **TRECOS** mark if they obtain a low product category score according to the **TRECOS** Ten Rules of environmental impact.

Recycling

In order to meet recycling obligations for plastic, paper and metal waste, both in the UK and abroad, Clover Chemicals are a member of Valpak, Repak and the European Green Dot scheme.

Product safety

The Ultra Dose cleaning chemicals fully comply with EC directives regarding the biodegradability of surfactants (Detergents Directive 648/2004) and Controls on Nonylphenol and Nonylphenol Ethoxelates (S.I. 2004/1816).

Product Range

Choose up to four products to make up a customised Ultra Dose system

Ultra Dose

UB10

Degreaser

UB10 is a powerful degreaser containing specialist detergents and water-soluble solvents. Ideal to rapidly remove grease, oils and fats from safety flooring, stainless steel, ceramic tiles, plastic and laminated flooring.

66 40

CODE: 991

UB20

Sanitiser

Effective against all bacteria as a general cleaner and sanitiser, UB20 is neutral, odourless and taint-free and passes BS EN1276:1997 at a dilution of 0.5% with a 5 minute contact time.

200 66

CODE: 992

UB30

Toilet/Washroom Cleaner

An effective cleaner that combats bacteria, water scale and dirt, leaving a pleasant apple fragrance. Suitable for use on all surfaces including porcelain, ceramic tiles, stainless steel and chrome.

100 33

CODE: 993

UB40

Washing Up Liquid

A concentrated detergent for washing up by hand, UB40 contains an advanced blend of cleaning agents. Leaves crockery, cutlery, glassware and utensils sparkling and grease free.

200

CODE: 994

UB50

Multi-Surface Cleaner

UB50 is a pleasantly fragranced, multi-functional cleaning solution that is suitable for use on all water washable surfaces, including stainless steel, ceramic, marble and wood.

66 40

CODE: 995

UB60

Floor Maintainer

Used regularly, UB60 builds gloss on floors and leaves a fresh, spicy fragrance. Suitable for use on all polished and some non-polished floors, UB60 is effective against dirt, grime and rubber scuff marks.

100 33

CODE: 996

UB70

Air Conditioner

UB70 contains a universally acceptable, oriental spice perfume in a slow release water-soluble carrier for long-lasting results. Used through a trigger spray, it enhances the atmosphere in any establishment.

100

CODE: 997

UB80

Glass Cleaner

Ideal for the daily cleaning of glass, mirrors and plastics, UB80 contains specialist detergents designed to liquefy dirt on contact. Removes finger marks and grime to leave a streak-free finish.

28

CODE: 998

UB90

Fragrant Room Cleaner

UB90 is a pleasantly fragranced, multi-surface cleaning solution for the cleaning of all washable room surfaces including glass. Ideal for cleaning tables, chairs, doors, mirrors and all glass surfaces.

66

CODE: 999

Triggers of cleaning solution per 2 Litres of concentrate

Buckets of cleaning solution per 2 Litres of concentrate

Sinks per 2L of UB40 concentrate

Use biocides safely. Always read the label and product information before use.
