

ACTIFOAM (410)

FOAM BOOSTING SHAMPOO

- *Concentrated formula for economy in use*
- *Produces a dense, white clinging foam*
- *Ideal to supplement car shampoo to boost performance*

A highly effective detergent foam booster for use on alkali sensitive surfaces.

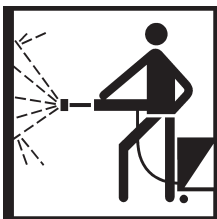

A clear, viscous liquid that contains a high blend of surfactants, Actifoam produces a long-lasting mild foam to ensure sustained cleaning action and rinses away easily to leave a streak free finish.

Super-concentrated for automated car washing.

DIRECTIONS

Adjust the machine feed to the level of foam and suds required (typical dilution at the nozzle is 1:100). Do not mix with other chemicals. ACTIFOAM is normally allocated its own detergent feed, and is best suited for use in conjunction with a shampoo on the initial wash cycle.

ACTIFOAM : WATER	1:100
