- ***Kills 99.999% of bacteria (passes BS EN 1276:1997).***
- ***Kills MRSA, E-Coli, Salmonella and Listeria.***
- ***Quick and easy to use - spray on and wipe off.***
- ***Safe on any water washable surface.***
- ***Recommended for infection control in the food industry and the care sector.***

Effective bactericidal action

AX is proven to kill **99.999%** of bacteria (tested to BS EN 1276:1997). It has been tested against MRSA NCTC 12493 and has also been proven to kill E-Coli, Pseudomonas aeruginosa and Staphylococcus aureus. It is therefore essential for use in kitchens and other establishments throughout the food industry where effective sanitising against bacteria is vital. AX is also widely used in care homes for the control of MRSA.

Quick and easy application

As a ready-to-use product, AX is a particularly quick and easy to use: simply spray on, leave for one minute and wipe off. No rinsing is required as AX dries quickly, leaving surfaces clean, free from residue and safe for food contact. This saves valuable time when cleaning and sanitising during a shift in a busy kitchen.

Versatile

A major benefit of AX is its versatility. With a non-perfumed, neutral formulation, it is safe for use on any water washable hard surface. In kitchens and catering establishments, it is commonly used to clean and disinfect work surfaces, food display cabinets, chillers, sneeze screens, fridges, food probes and general surfaces including glass, stainless steel, aluminium and plastic.

AX is highly recommended for cleaning and sanitising in food handling, preparation and storage areas and for the effective control of MRSA in the care sector.

AX is available in 750ml and in 5L pack sizes.

Use biocides safely. Always read the label and product information before use.
