

Kills 99.999% of bacteria

Trio 100 is a concentrated bactericidal cleaner which kills 99.999% of bacteria to the British standard BS EN 1276.

In independent tests, Trio 100 has been **proven to kill MRSA** NCTC 12493.

Also effective against Salmonella, E-Coli and Listeria, Trio 100 has a Q.A.P of 120, meaning that it can be used as a sanitiser at a 1% solution, with a contact time of 5 minutes.

Alternatively, Trio 100 can be used as a sanitiser in a 5% solution, needing only 10 seconds contact time.

Trio 100 is a highly effective sanitiser to control product contamination in all areas where bactericidal control is a priority.

Non-tainting for food areas

Trio 100 has been designed for use in food hygiene environments, as it is non-tainting, neutral and completely water soluble.

As a sanitiser concentrate, Trio 100 is recommended for cleaning and disinfecting all hard surfaces on a regular basis.

It is recommended for use on: work surfaces, equipment, tanks, floors, walls, delivery vehicles, microwaves, fridges, chillers, cupboards and shelves.

Therefore, Trio 100 is ideal for use in food preparation areas where a large variety of surfaces and equipment need to be sanitised.

TRIO 100

SANITISER CONCENTRATE
