

# THE BUG KILLERS!

*Proven to latest rigorous European standards!*

Clover Chemicals' top-selling bactericidal products - Trio 100, Sola-Bac and UB20 - have been shown to meet **BS EN 1276:1997**, a recently revised standard for the bactericidal activity of chemical disinfectants.

*What does 'BS:EN 1276:1997' mean?*

Products meeting this standard must now prove even higher effectiveness, producing a 100,000 fold reduction in bacterial cells at a temperature of 20oC within 5 minutes. The strains of bacteria used - Pseudomonas aeruginosa, Escherichia coli, Staphylococcus aureus and Enterococcus hirae - are the most common and problematic within the food, industrial, domestic and institutional areas.

## SOLA-BAC Heavy Duty Bactericidal Cleaner

Proven to kill Staphylococuss Aureas, Listeria, Salmonella and E-Coli.

Used at 1:200, 5l of concentrate dilutes with water to make 1000l of sanitiser solution.

Combines a powerful cleaning action with bactericidal properties to clean and sanitise in one operation.

Ideal for cleaning and sanitising in bakeries, confectioners, meat preparation, breweries, hospitals, kitchens and restaurants.

## TRIO 100 Sanitiser Concentrate

Proven to kill Staphylococuss Aureas, Listeria, Salmonella and E-Coli.

Used at 1:120, 5l of concentrate dilutes with water to make 600l of sanitiser solution.

Technical tri-biocidal formula attacks each bacteria with 3 separate actions for rapid and efficient sanitisation.

Recommended for infection control in hospitals, care homes, schools and throughout the food industry.

Use to disinfect floors, walls, tiles, plastic fittings, showers, aluminium, painted surfaces and stainless steel.

## UB20 Sanitiser Concentrate

Proven to kill Staphylococuss Aureas, Listeria, Salmonella and E-Coli.

Used at 1:200, 5l of concentrate dilutes to make 1000l of sanitiser solution.

For use through the Ultrablend 4 dilution system, UB20 is essential for large establishments for the economical control of contaminating organisms.

*Clover Chemicals believe that the proven effectiveness of these products will make it even easier for distributors to sell them into a wide range of industries, including healthcare and food hygiene.*
