

# PRODUCT UPDATE

## Important packaging changes:

**2 x 5L to replace 4 x 5L:** In the coming months, Clover is to phase out the 4x5L cases, and will instead sell all 5 litre bottles in cases of two. This change has been made in line with European manual handling regulations, and will come into effect gradually as stocks of each product in 4x5L have been run down.

**20L to replace 25L:** We will subsequently be replacing 25 litre drums with 20 litre drums. This, again, is necessary to comply with weight regulations and will be implemented over a period of time.

The prices of all products in these pack sizes will of course change in accordance with this.

***Please remember to change your orders accordingly!***

## Targ now available in 5L pack size

Due to customer demand, Targ, Clover Chemicals' graffiti remover, is now available to buy in both 1L and 5L packs. The specialised solvent-based product penetrates and dissolves stains consisting of aerosol spray paints, felt-tip pen, ball point pen and crayon. Effective in removing graffiti from brickwork, glass, metal, stone, wood, porcelain and ceramic tiles, the new 5L Targ pack offers users the same powerful cleaning action as the smaller pack with the added benefit of greater economy in use.

## New *Ultra Blend* 4 product: UB40

Clover Chemicals' Ultrablend range of super-concentrates now features UB40, a concentrated washing-up liquid. Designed for use through the economical Ultrablend 4 dilution system, UB40 contains an advanced blend of cleaning agents which leave glassware and crockery sparkling and grease free. Customers using the Ultrablend system in kitchens will find this product a particularly valuable addition to the existing range.
